

# Equitably Advancing Water Conservation in the San Francisco Bay Area

Bay Area One Water Network  
June 28, 2022

Richard G. Luthy  
Stanford University

# Bay Area One Water Network

BAY AREA  
ONE WATER  
NETWORK

Supporting efforts to ensure equitable, safe and resilient water systems.

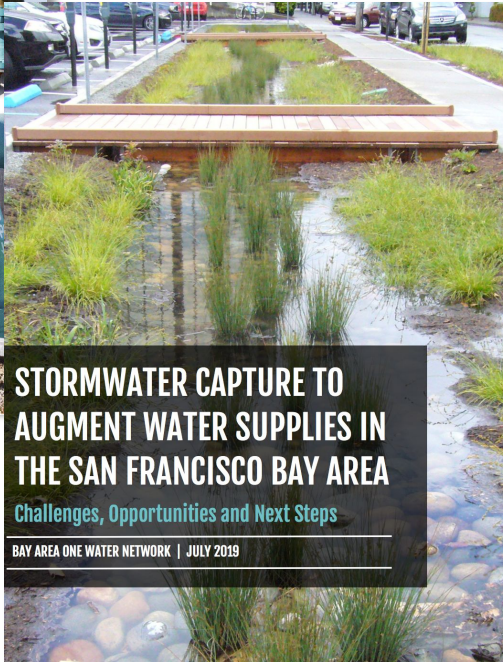

We share information, build collaborative capacity, and advance discussions about increasing the sustainability of water supplies in the region.

## Next Steps for the Bay Area One Water Network: the Bay Area's Water Supply in 2050

Nature-based Solutions for Shoreline Resiliency in the Bay Area (BAOWN & SFEP)

# Opportunities for conservation

BAY AREA  
ONE WATER  
NETWORK

- Center equity in water conservation planning to fairly distribute the benefits & costs of water conservation among the population, and avoid unintended consequences of using less water
- Open discussions
- Produce a publicly-available report (without attributions)

# Workshop Objectives

BAY AREA  
ONE WATER  
NETWORK

- Identify drivers and shared goals for conservation
- Share lessons and technical information
- Assess potential unintended consequences of conservation
- Strategize how to fairly distribute the benefits among the population
- Define actionable recommendations & implementation strategies
- Identify knowledge gaps & next steps

# The Program

BAY AREA  
ONE WATER  
NETWORK

- Today: stage-setting for context, time for Q&A
  - State-wide perspective
  - Bay Area efforts
  - Impacts on wastewater services
  - Equitable approach to rate-making
- Tomorrow: in-person meeting & breakout groups
